

Tumurly® Vertical Wind Turbine Series

Power : 2kW- 5kW
Voltage Options : 12/24/48V
Application : On-grid / Off-Grid
Automatic Breaking : Available

Wind Turbines

Solar System

Tumurly® Hybrid System

Wind + Solar

Turbo Series Wind Turbines convert the energy in wind to electricity by rotating propeller around the rotor efficiently. Tumurly Turbo Series wind turbines work in harmony with Off-Grid Solar Systems as hybrid as well. It is easily being integrated into existing Solar Systems and connecting to batteries directly. Tumurly Wind Turbines which are extremely durable, efficient and powerful, can generate electricity 24/7 depending on the wind speed and air density .
